

CONSUMER CONFIDENCE REPORT

Each year we provide our customers an annual Consumer Confidence Report (also known as the Annual Water Quality Report). This report contains important information about your water supply such as where we obtain your water, a source water assessment of your water, and other educational materials. It also shows the contaminants found in your drinking water during 2023 and the levels of each. We are happy to announce that all contaminants are well below the allowed limits. Additionally, **NO Lead** was found in any of our samples collected in 2023

To view this year's Consumer Confidence Report you can go to the following url:

Curran-Gardner:

<https://www.currangardner.com/CGCCR2023>

CWLP:

<https://www.currangardner.com/CWLPCR2023>

SSWC:

If you would like to receive a hard-copy of this report, please stop by our business office during regular business hours (8:00 am to 3:30 pm) or call 217-546-3981 and a copy will be mailed to you. Any questions may be directed to Operations Manager Aaron Smith 217/546-3981

Water District History

Aug. 23, 1966 Petition filed in Sangamon County Court to establish the Curran-Gardner Townships Public Water District.

Sept. 17, 1966 Court Approval to create water District.

Sept. 28, 1966 Court order to establish water District and appoint board of trustees.

EYE ON WATER

We cannot express the importance of the Eye on Water software. As District meters are changed to cellular meters, a copy of the Eye on Water procedures is mailed to you.

This software is a valuable tool to monitor your household usage. This software is compatible with your PC and/or cell phone. Thresholds may be defined to send high usage alerts to you. These alerts enable you to notify the District should you have a leak and make necessary repairs quickly. Usage reports are available to you to help you identify peak times and constant usage should a stool be sticking, etc.

If you need assistance with downloading the software process, please contact our office (217/546-3981). We can also make an appointment to train you in the process if need be.

BULK WATER SALES

The District has two bulk water stations located in Bradfordton and Farmingdale. Due to technical difficulties, the pay rate could not be adjusted in a timely fashion. To date the meters have been calibrated to reflect current rates.

Summer Hydration: Why should kids drink water rather than other beverages?

Kids think that water is a boring choice, but it's the perfect beverage when compared to the alternatives. Many people think that they need bottled water, but tap water is just fine and the good news is that it is readily available. Many kids want to drink sports drinks in the summer, but these often contain too much sugar. These drinks were formulated for use in athletes who are performing intense workouts and losing electrolytes. There are definitely times where these beverages can help to replace lost electrolytes, but sports drinks are for sports. In fact, even in sports situations alternating sports drinks with water when drinking on the sideline or at halftime is a plus.

IMPORTANT..STAY HYDRATED

The Board of Trustees and

Staff Wish You a

Happy and Safe Fourth of July!

Monthly Board Meetings

Monthly meetings are held on the second Tuesday of each month at 7:00pm. The public is welcome. If you cannot join us, the minutes are located on our website at www.currangardner.com

District Administrative Office:
3384 Hazlett Road, Springfield, IL 62707

Habitat for Humanity

Sangamon County Habitat for Humanity has launched a program to facilitate large item pickup free of charge. Contact

217/523-2710

to schedule pickup for qualified items.

Why might there be flags in my yard?

Flags across your property is an indication that someone has contacted the Julie 811 to mark underground utilities. The District regularly marks the location of water lines so they are not struck during any digging or excavation. By law, prior to any digging or excavation, the public must call Julie 811. Calls may be placed by customers, utility departments, engineering firms, or contractors. **Blue flags are used to indicate where water utilities are underground.** As you will see in the graphic, each utility is represented by a specific color which means something different. The primary reason flags are placed is due to a planned excavation in the vicinity of your property. The excavation could be for any number of things such as a service line repair, new water tap installation, or other utilities installing or repairing their infrastructure. It may be as simple as your next-door neighbor is installing a new mailbox or planting a tree. Below reflects the flags and their respective legend.
